²University of Florence

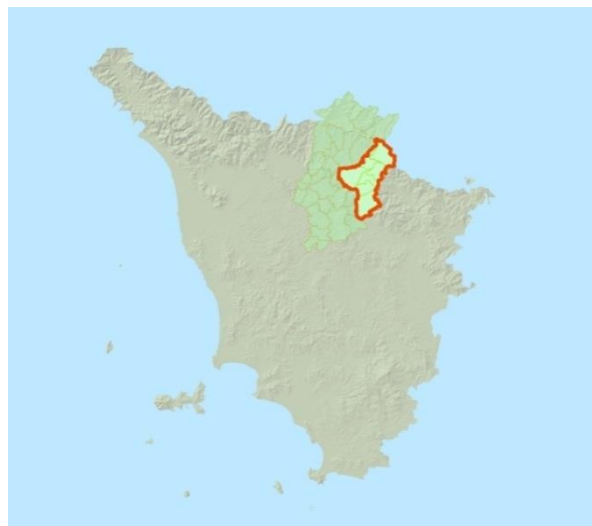

April 6th, 2017

MUNICIPALITIES UNION VALDARNO AND VALDISIEVE (UCVV)

Tuscany, Italy

In the north
est side of
Tuscany

Rincine public forest (green)
and project area (red)

The activities of UCVV

1. **Public forest properties (tuscany region)(PAFR)) management** and Muraglione property (UCVV owner) 4.500 ha according to sustainable selvicolture rules;
2. **Training and qualification of forest workers** (public and private) to improve safety standars and productivity level at the same time;
3. **Management** of the processes about **agriculture and forest activities** linked by specific regional laws (LR 39/00 e s.m.i.) (tagli boschivi, movimenti terra, ecc.) and, in associated way for the municipalities also for building activities;
4. **Active partecipation in the integrated sistem fire fight of Tuscany** region through the availability of specialized personell and destinated ; associated management of burned forest areas inventory;
5. **Hydraulic maintenance of waterways**
6. Intermunicipality civil protection office;
7. Associated management of the enviromental impact evaluation processes;
8. Agriculture activities service (ecotourism, enviromental education etc.)
9. **Field research activities in collaboration** with UNIFI, CNR and others;
10. Actions to promote renewable energy sources
11. To be underlined that the **only one Italian Model Forest is based here, in Rincine**

The activities of UCVV in the project

1. Action B1, existing data forniture
2. Action B2, new data acquisition
3. Action B5, data elaboration
4. Action D6, workshop and seminars
5. Action D7, networking

LIST OF BENEFICIARIES

- 1) Italian Academy of Forest Sciences (Coordinating beneficiary)
- 2) Municipality of Caprarola
- 3) Society Demetra
- 4) Oben spin-off of the University of Sassari
- 5) Molise Region
- 6) RomaNatura
- 7) Municipalities Union Valdarno and Valdisieve
- 8) University of Florence
- 9) University of Molise
- 10) University of Tuscia

PROJECT DURATION

Start date: September 7th, 2015

End date: September 6th, 2019

PROJECT BUDGET

Total project budget: € 2,854,979

Total eligible project budget: € 2,810,804

EU financial contribution: € 1,686,201

OBJECTIVES

Demonstrating the feasibility of integration of data collected from forest inventories with remotely sensed information for the spatial estimation of selected Forest Europe quantitative indicators of Sustainable Forest Management (SFM)

Goals of demonstration activities:

1. Testing and evaluating the technical and economic feasibility of integrating remote sensed information collected by Drones equipped with LiDAR and multispectral sensors, with plot-level data from forest inventories, in order to:
 - i) map Forest Europe SFM indicators;
 - ii) stratify medium to large scale forest management units by the EEA classification of European Forest Types (EFTs)
2. Developing a Forest Information System, aggregating multiple indicator maps, to support forest managers to evaluate success towards SFM at the scale of the forest management unit

PROJECT ACTIONS

| Action | | 2015 | | | | 2016 | | | | 2017 | | | | 2018 | | | | 2019 | | | | 2020 | | | |
|--|--|------|----|-----|----|------|----|-----|----|------|----|-----|----|------|----|-----|----|------|----|-----|----|------|----|-----|----|

STUDY AREAS

1 Rincine

Municipality of Londa (Florence, Tuscany)
Regional estate forest
Managed by Unione di Comuni Valdarno e Valdisieve

2 Caprarola

Municipality of Caprarola (Viterbo, Lazio)
Regional Nature Reserve of Lago di Vico
Site of the Natura2000 network
Managed by Municipality of Caprarola

3 Decima Malafede

Municipality of Rome (Rome, Lazio)
Nature Reserve Decima Malafede
Site of the Natura2000 network
Managed by RomaNatura

4 Bosco Pennataro

Municipality of Vastogirardi (Isernia, Molise)
Site of the Natura2000 network
Managed by National Forest Service, Office for Biodiversity Isernia

1. Rincine (500-1000 m asl)

2. Caprarola (500-800 m asl)

— Study area
— Natura2000 site

3. Decima Malafede (50-100 m asl)

4. Bosco Pennataro (1000-1200 m asl)

| European Forest Type | Study area | | | |
|--|------------|-----------|-----------------|-----------------|
| | Rincine | Caprarola | Decima Malafede | Bosco Pennataro |
| Apennine-Corsican mountainous beech forest | X | X | | X |
| Chestnut forest | X | | | |
| Downy oak forest | X | | | |
| Italian alder forest | X | | | |
| Mediterranean evergreen oak forest | | | X | |
| Other thermophilous deciduous forests | X | | | |
| Plantations of not-site-native species and self-sown exotic forest | X | | | |
| Plantations of site-native species | X | | X | |
| Turkey oak, Hungarian oak and Sessile oak forest | X | X | X | X |
| Other (e.g., shrubs, non forest) | X | | X | |

ACTION B1 - Existing data acquisition and harmonization

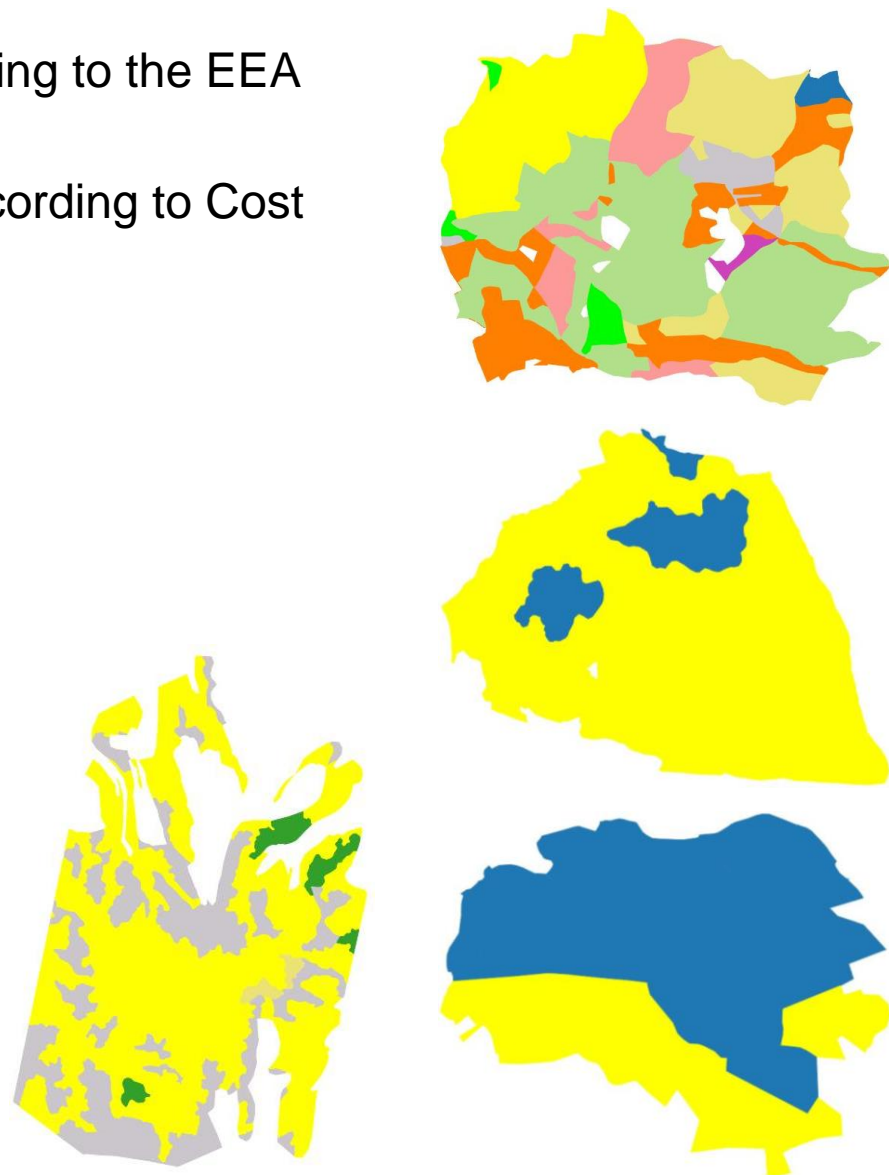

| Existing data | | Study area | | | |
|------------------------|------------------------|------------------|---------------------------------------|---------------------------------------|----------------------------|
| | | Rincine | Caprarola | Decima Malafede | Bosco Pennataro |
| Forest inventory data | Num. of plots | 16 (2004) | 65 (2006) | N | 77 (2013-2014) |
| | Ortophotos | Y (1954-2015) | Y (1989-2008) | Y (1989-2008) | Y (2005-2012) |
| | Multispectral data | N | Spot (2006), RE (2011), IRS (2012) | Spot (2006), RE (2011), IRS (2012) | Spot (2006), IRS (2012) |
| | LiDAR data | Y (2015) | N | N | N |
| Forest management data | Management plan | Y (2005-2019) | Y (1989, 2007) | N | Y (2008-2017) |
| | Forest compartment map | Y | Y | N | Y |
| | Forest type map | Y | Y | N | Y |
| Auxiliary data | Topographic map | Y | Y | N | Y |
| | Soil map | Y | Y | Y | Y |

| 2 | 1 | Acero opalo | 20 | 21.6 | 2 | 0.063 | 0.64 |

- Other
- Apennine-Corsican mountainous beech forest
- Chestnut forest
- Downy oak forest
- Italian alder forest
- Mediterranean evergreen oak forest
- Other thermophilous deciduous forests
- Plantations of not-site-native species and self-sown exotic forest
- Plantations of site-native species
- Turkey oak, Hungarian oak and Sessile oak forest

ACTION B2 - New data acquisition

- New forest inventory data
- New remote sensing data

Forest inventory data

- Sampling scheme: One-per-stratum stratified sampling
- Sample size: 50 plots in each study area
- Plot size: square plot 23x23 m (529 m²)

 Study area (Rincine)

- Sampling scheme: One-per-stratum stratified sampling
- Sample size: 50 plot in each study area
- Plot size: square plot 23x23 m (529 m²)

-  Study area (Rincine)
-  Square 23x23 m

- Sampling scheme: One-per-stratum stratified sampling
- Sample size: 50 plot in each study area
- Plot size: square plot 23x23 m (529 m²)

- Study area (Rincine)
- Square 23x23 m
- Cluster

- Sampling scheme: One-per-stratum stratified sampling
- Sample size: 50 plot in each study area
- Plot size: square plot 23x23 m (529 m²)

-  Study area (Rincine)
-  Square 23x23 m
-  Cluster
-  Plot selected for field measurements

Rincine

Caprarola

Decima Malafede

Bosco Pennataro

-  Square 23x23 m
-  Cluster
-  Plot selected for field measurements

A common sampling protocol was used for field works

- Positioning of permanent plots
- Measurements of living trees
- Measurements of standing deadwood
- Measurements of stumps
- Measurements of lying deadwood

Positioning of permanent plots

- GNSS receiver (min 150 positions)
- 1 metal stake was installed in the plot centre

Measurements of living trees

- DBH > 2.5 cm
- Species
- Total height
- Height to crown base
- Crown projection (4 radii)
- Tree position (x,y)
- Crown dieback
- Microhabitat

Measurements of deadwood

Standind deadwood

- DBH > 2.5
- Diameter at half height
- Total height

Stump

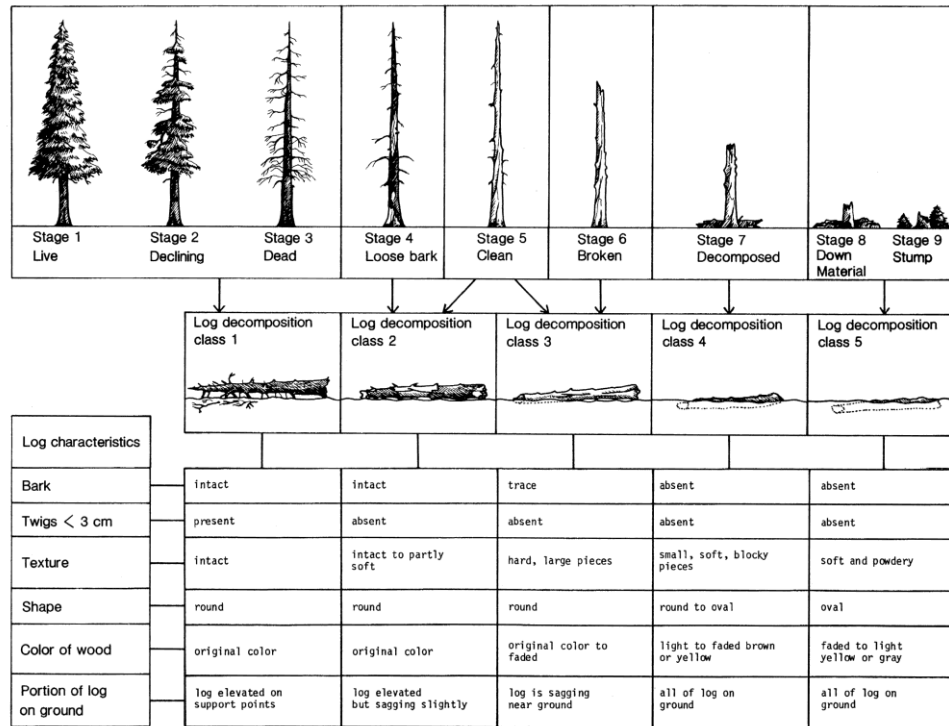

- Diameter > 10 cm
- Origin
- Total height

Lying deadwood

- Diameter > 10 cm, lenght > 1 m
- Diameter at half lenght
- Total lenght

All

- Species
- Position (x,y)
- Microhabitat
- Decay

Example of spatial data base

Rincine

-  Plot centre
-  Living trees
-  Standing deadwood
-  Stump
-  Trees outside the plot with their crown inside
-  Lying deadwood

Remote sensing data

We are using two types of Drones

Video 01

Video 02

eBee – RGB and NIR cameras

| | SONY WX | Canon S110 NIR |
|------------------------------------|----------------|----------------|
| Flight altitude above ground level | 145 m | 145 m |
| Camera | Canon S110 RGB | Canon S110 NIR |
| R | 660 nm | 625 nm |
| G | 520 nm | 550 nm |
| B | 450 nm | - |
| NIR | - | 850 nm |
| Overlap | 80% | 90% |
| Sidelap | 75% | 85% |
| Focal length | 4 mm | 5 mm |
| ISO Sensibility | ISO-100 | ISO-1600 |
| Shutter speed | 1/2000 sec | 1/2000 sec |
| Image dimension | 4608 x 3456 | 4000 x 3000 |
| Field of view | 200 x 150 m | 168 x 126 m |
| Estimated ground sampling distance | 0.050 m | 0.042 m |

eBee – Num. of flights, acquisition time and num. of images in each study area

| Camera | Study area | Num. of GCP | Num. of flights | Tot. acquisition time | Num. of images |
|--------|-----------------|-------------|-----------------|-----------------------|----------------|
| RGB | Caprarola | 12 | 4 | 3h20' | 483 |
| NIR | Caprarola | | 5 | 4h20' | 564 |
| RGB | Bosco Pennataro | 12 | 4 | 3h50' | 608 |
| NIR | Bosco Pennataro | | 5 | 4h35' | 689 |
| RGB | Rincine | 12 | 4 | 3h25' | 506 |
| NIR | Rincine | | 5 | 4h10' | 682 |
| Tot. | | 36 | 27 | 52h40' | 3532 |

Softwares:

- eMotion2 to simulate, to plan and to monitor the flight
- Agisoft PhotoScan for image processing and to create a 3D point cloud

Products:

- 2 dense point clouds, RGB and NIR (ranging between 20-40 points/m²)
- 2 Digital Surface Model - DSM (50 cm spatial resolution)
- 2 ortophotos, RGB and NIR (10 cm spatial resolution)

Video 03

Octocopter – LiDAR sensor

Sensor:

- Yellowscan (up to 50 points/m²)

Software:

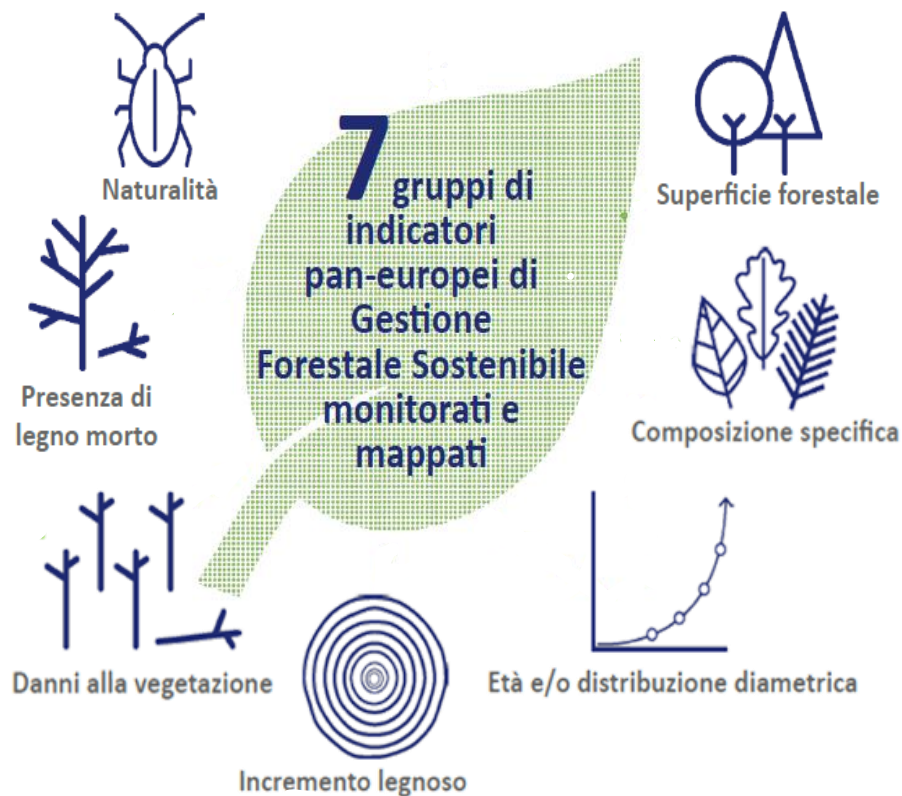

- Lastools for 3D point cloud processing and analysis

Products:

- 3D point cloud
- Digital Surface Model - DSM
- Digital Terrain Model – DTM
- Canopy Height Model – CHM = DSM-DTM

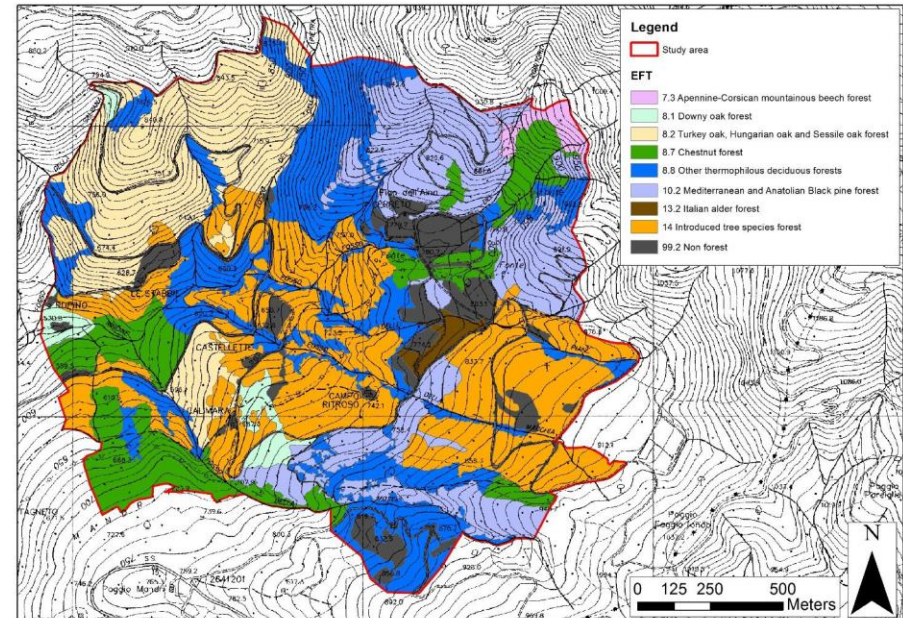

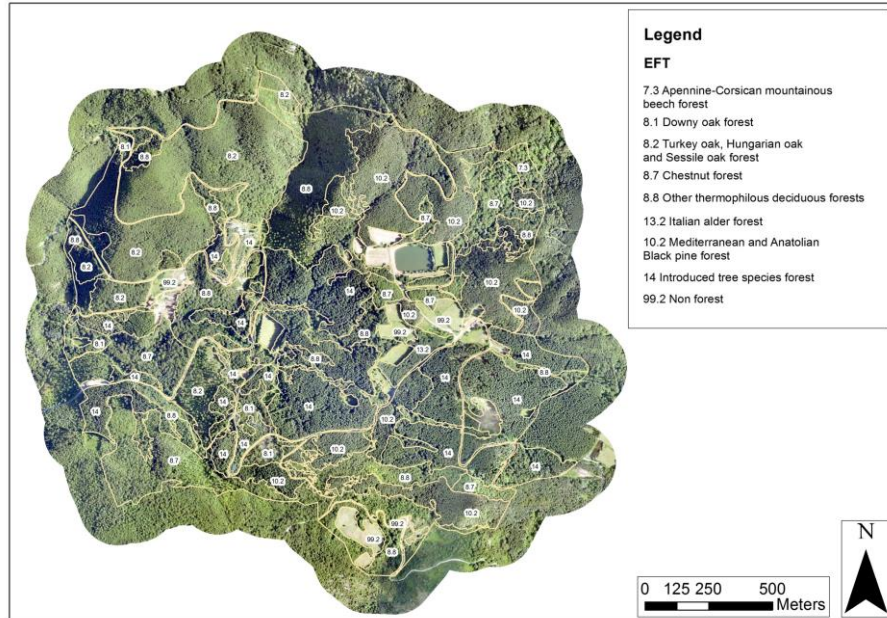

ACTION B3 – Mapping SFM indicators

- Action B3 is in progress
- At present we are working on:
 - 1) EFT classification
 - 2) Defoliation
 - 3) Growing stock volume

Preliminary results – European Forest Types

| Study area | Visual classification | | | Semiautomatic classification | | | | |
|-----------------|-----------------------|--------------|------|------------------------------|----------------|-------|--------------|------|
| | Time (h) | Accuracy (%) | | Time (h) | | | Accuracy (%) | |
| | | OA | KIA | Segmentation | Classification | Total | OA | KIA |
| Rincine | 10 | 0.94 | 0.92 | - | - | - | - | - |
| Caprarola | 8 | 0.90 | 0.82 | 0.45 | 3 | 3.45 | 0.80 | 0.62 |
| Bosco Pennataro | 8 | 0.74 | 0.37 | - | - | - | - | - |

Preliminary results – Defoliation

Preliminary results – Growing stock volume (m³/ha)

Adjusted r²

Thank you for your attention!!
